

Bouchier Reports 1 Million Consecutive Hours worked without a Recordable Injury - 3rd Year in a Row

November 2nd, 2021 – Fort McKay

Bouchier has achieved a critical and significant safety milestone – one they have maintained for three consecutive years in a row. Bouchier is Canada’s leading Indigenous owned contracting and facility management company with 900 employees in their workforce.

2021 marks, the 3rd year in a row that Bouchier has accomplished over a million consecutive hours worked without a recordable injury. Bouchier first achieved this critical safety milestone in 2019.

This continued performance and achievement is because of a strong safety-first culture driven from the Bouchier ownership, executive team, senior leadership, and all team members.

“Our people come first at Bouchier. Our safety-first culture ensures everyone goes home to their families. Accomplishing this critical safety record during the last few very challenging years is a testament to the care and support that our team members have for each other, for our clients and our community.” says David Bouchier, Co-Owner & President.

“Our safety leadership is embedded into our culture, at Bouchier we are continually learning, improving and adopting new procedures and processes to ensure we can provide a safe work environment for everyone, whether you’re in the office, on site or in the field.” says Bernie George, Director of Bouchier HSE and Training.

The economic and social challenges our industry has faced combined with the stress and uncertainty of the COVID-19 pandemic have impacted us all. Bouchier recently created numerous programs to support the ongoing health and wellness of its employees including a winter preparedness program and a wellness program. As the company continues to grow, people safety remains its top priority.

David and Nicole Bouchier would like to thank everyone —as well as our esteemed clients—for helping to make this great accomplishment possible again – for a third year in a row.
