Sharkbite Project

In early 2023, Bouchier was awarded the Sharkbite Project.

24 labourers and operators, a mix of new hires and experienced personnel, supported the construction of a vital ring road for light and heavy-duty traffic. The scope was executed safely, on time, and on budget even with an increased work scope that added to the overall complexity of the project.

The Major Projects team at this oil sands site was aware of Bouchier's capability based on previous projects and this led to new opportunities for collaboration. The Sharkbite Project exemplifies Bouchier's dedication to delivering exceptional results and building lasting relationships in the industry.

The Outcome

The Sharkbite Project supports the growing transportation needs of the site and represents a significant milestone for Bouchier. By securing this contract, Bouchier expanded our service offering beyond road maintenance to take on the construction of a ring road for light and heavy-duty traffic. By enhancing the transportation infrastructure, Bouchier improved efficiency and safety for this oil sands company.

Bouchier's competitive edge lies in our core values of honesty, reliability, safety, commitment, and pride in our work. These qualities make us a preferred contractor in the industry, and we aim to uphold them in every project we undertake.
